

NovaCore · Atlas Data Gateway Product Specification

Specification ID: PRD-ATLAS-2026-10

Release: 2026.10 · status: staging validation

The gateway accepts signed service requests and emits tenant-scoped audit events.

The ingestion API supports PDF text, image OCR, and canonical structured records.

Embedding dimensions are 1536 for the current Gemini Embedding 2 index.

Production release requires security review and a hosted migration verification.
